

CANOE MARATHON MASTERS WORLD CHAMPIONSHIPS

GYŐR | 1-2 SEPTEMBER 2025

Dear Masters Athletes,

Dear Sport Friends,

Hungarian canoeing, a sport with a rich history, has a tremendous opportunity to once again host the Canoe Marathon World Championships in Győr, following the successful event in 2015. This September, we welcome the world's best marathon paddlers to the Mosoni-Danube, with our goal being to create unforgettable experiences for both athletes and spectators alike.

In keeping with the traditions of the International Canoe Federation, the masters athletes will take to the water a few days prior to the elite athletes, competing for the world championship title on the same course.

As a nation deeply devoted to canoeing, we believe that this sport embodies a lifelong passion, and one of its greatest appeals is that it can be enjoyed by all age groups. Masters competitions also have a strong tradition in our country, and

I am confident that we will showcase that tradition during this exceptional event.

Success and victory are not merely defined by the color of the medal, but also by the steadfast dedication, daily effort, and strong commitment that span decades. Masters competitors set an example for those around them, passing on their love for the sport to future generations.

I extend my utmost respect to all masters athletes, whom we warmly and sincerely welcome in Győr on September 1st-2nd!

MASTERS MIX KAYAK

The competition is run in compliance with the effective ICF Rules ([ICF Canoe Marathon Competition Rules 2025](#)) combined with the rules of the Host Organising Committee (hereinafter referred to as "HOC") specific to the masters races.

Extract from the ICF Rules:

- A competitor can participate in the masters category in which they meet or have already met the lower age limit of the given age group within the competition year.
- In K2 and C2 events the age of the youngest competitor will determine the age group in which a crew can compete.
- A valid Masters World Championship is held only if there are at least four (4) boats from four(4) different nations in the event. If during the course of the event some competitors drop out or do not finish, the validity of the Championships is not affected.
- Entries will be permitted in doubles from mixed nation combinations. One mixed double will only be counted as one nation in terms of the number of nations when establishing the World Championship classes

If this criteria not achieved 10 days before the first day of the competition the events will not be a World Championships. They may still be held but will have Masters Cup classification.

Special rules:

- The ICF rule for Wave Riding on other classes will not be enforced for master's races as the number of classes racing at the same time will make this impossible to enforce fairly.
- One competitor can compete in maximum 3 events.

Medal Ceremony

- In every event of the ICF Canoe Marathon Masters World Championships, the first three boats will receive medals, regardless of the number of participants or the number of nations competing in the event.
- **Athletes who achieve a podium finish must be present in the medal ceremony waiting area at least 10 minutes before their ceremony.** No medal presentation will be held if less than three individuals or combinations complete the race or if all three individuals or combinations to be awarded are not present.

COURSE

The course will traverse the Mosoni-Duna and Rába rivers as well as the city center of Győr, combining sections through natural landscapes with those in an urban setting.

The start, finish, and portage areas will all be located in the same vicinity. Competitors will start from a pontoon, with boat-holders assigned to assist each participant. **A 100-meter portage will be situated along the riverbank near the finish line. Both ends of the portage will feature sandy beaches for disembarkation and embarkation, eliminating the need for pontoons.** The portage area will be clearly delineated with barriers and marked with red and yellow indicators at the disembarkation and embarkation points.

The portage will be wide enough to accommodate at least four K2 boats simultaneously.

The various distances will be made up of the required number of full long laps plus one slightly shorter lap which will result a shorter distance from the last portage to the finish on the final lap.

For those portaging, there will be no portage at the end of the first lap.

During every lap where there is no portage, it is mandatory for the competitors to pass between the floating advertisement and the dock. Electronic timing will be used and a photo-finish camera with video recording will be installed at the finish line.
